

Ikarus::Materials::
VanishingStress::materialInversionImpl

Ikarus::Materials::
VanishingStrain::tangentModuliImpl

Ikarus::reduceMatrix

```
graph LR; A["Ikarus::Materials::  
VanishingStress::materialInversionImpl"] --> C["Ikarus::reduceMatrix"]; B["Ikarus::Materials::  
VanishingStrain::tangentModuliImpl"] --> C;
```

The diagram illustrates a dependency or data flow. Two source boxes on the left, representing different material implementation classes, have arrows pointing to a single target box on the right. The target box is shaded gray, while the source boxes are white with black borders. The arrows are blue and point from the right side of each source box to the left side of the target box.
