

Ikarus::Python::register
DirichletValues

Ikarus::DirichletValues
::setZeroAtConstrainedDofs

Ikarus::DirichletValues
::isConstrained

```
graph LR; A["Ikarus::Python::register<br/>DirichletValues"] --> C["Ikarus::DirichletValues<br/>::isConstrained"]; B["Ikarus::DirichletValues<br/>::setZeroAtConstrainedDofs"] --> C;
```

The diagram illustrates a dependency or relationship between three code components. On the left, there are two white rectangular boxes. The top box contains the text 'Ikarus::Python::register' followed by 'DirichletValues' on a new line. The bottom box contains 'Ikarus::DirichletValues' followed by '::setZeroAtConstrainedDofs' on a new line. On the right, there is a gray rectangular box containing 'Ikarus::DirichletValues' followed by '::isConstrained' on a new line. Two blue arrows point from the right side of the two white boxes to the left side of the gray box, indicating that both functions on the left depend on or interact with the 'isConstrained' property of the 'DirichletValues' class.
