

Ikarus::AssumedStress
::calculateAtImpl

Ikarus::AssumedStress
::setAssumedStressType

Ikarus::AssumedStress
::numberOfInternalVariables

```
graph LR; A["Ikarus::AssumedStress::calculateAtImpl"] --> C["Ikarus::AssumedStress::numberOfInternalVariables"]; B["Ikarus::AssumedStress::setAssumedStressType"] --> C;
```

The diagram illustrates a dependency or relationship between two source methods and a target attribute. On the left, two white rectangular boxes represent the source methods: 'Ikarus::AssumedStress::calculateAtImpl' (top) and 'Ikarus::AssumedStress::setAssumedStressType' (bottom). On the right, a gray rectangular box represents the target attribute: 'Ikarus::AssumedStress::numberOfInternalVariables'. Two blue arrows point from each source method box to the target attribute box, indicating that both methods depend on or interact with this attribute.
