

Ikarus::utils::globalIndex
FromGlobalPosition

Ikarus::utils::obtainLagrange
GlobalNodePositions

Ikarus::utils::forEachLagrange
NodePosition

```
graph LR; A[Ikarus::utils::globalIndex<br/>FromGlobalPosition] --> C[Ikarus::utils::forEachLagrange<br/>NodePosition]; B[Ikarus::utils::obtainLagrange<br/>GlobalNodePositions] --> C;
```

The diagram illustrates a data flow where two separate input operations feed into a single processing step. On the left, two white rectangular boxes with black borders contain the text 'Ikarus::utils::globalIndex FromGlobalPosition' and 'Ikarus::utils::obtainLagrange GlobalNodePositions'. Blue arrows point from the right side of each of these boxes to the left side of a single gray rectangular box with a black border on the right. This gray box contains the text 'Ikarus::utils::forEachLagrange NodePosition'.
