```

The diagram illustrates a dependency or data flow where four different components on the left converge into a single component on the right. The components on the left are arranged vertically and each has a black border. The component on the right, 'Ikarus::removeCol', is shaded gray and also has a black border. Four blue arrows originate from the right side of each left box and point towards the left side of the right box. The arrows from the top two boxes are slightly curved, while the arrows from the bottom two boxes are more direct.
