::basis

```
graph LR; A["Ikarus::DirichletValues::evaluateInhomogeneousBoundaryCondition"] --> C["Ikarus::DirichletValues::basis"]; B["Ikarus::DirichletValues::evaluateInhomogeneousBoundaryConditionDerivative"] --> C;
```

The diagram illustrates a relationship between three functions. On the left, there are two white rectangular boxes. The top box contains the text 'Ikarus::DirichletValues::evaluateInhomogeneousBoundaryCondition'. The bottom box contains the text 'Ikarus::DirichletValues::evaluateInhomogeneousBoundaryConditionDerivative'. On the right, there is a gray rectangular box containing the text 'Ikarus::DirichletValues::basis'. Two blue arrows point from the right side of the top-left box to the left side of the gray box, and from the right side of the bottom-left box to the left side of the gray box.
