::basis

```
graph LR; A["Ikarus::DirichletValues::evaluateInhomogeneousBoundaryCondition"] --> C["Ikarus::DirichletValues::basis"]; B["Ikarus::DirichletValues::evaluateInhomogeneousBoundaryConditionDerivative"] --> C;
```

The diagram illustrates a dependency or inheritance relationship. Two source functions, 'Ikarus::DirichletValues::evaluateInhomogeneousBoundaryCondition' and 'Ikarus::DirichletValues::evaluateInhomogeneousBoundaryConditionDerivative', are shown on the left. Blue arrows point from each of these source functions to a target function, 'Ikarus::DirichletValues::basis', which is highlighted in a gray box on the right.
