

Ikarus::NonLinearElastic
::calculateMatrixImpl

Ikarus::NonLinearElastic
::calculateVectorImpl

Ikarus::NonLinearElastic
::stress

```
graph LR; A[Ikarus::NonLinearElastic::calculateMatrixImpl] --> C[Ikarus::NonLinearElastic::stress]; B[Ikarus::NonLinearElastic::calculateVectorImpl] --> C;
```

The diagram illustrates a dependency or call relationship. Two functions on the left, 'Ikarus::NonLinearElastic::calculateMatrixImpl' and 'Ikarus::NonLinearElastic::calculateVectorImpl', both have arrows pointing to a single function on the right, 'Ikarus::NonLinearElastic::stress'. The right-hand function is highlighted with a gray background, indicating it is the target or a common result of the two operations.
