

Ikarus::DirichletValues  
::evaluateInhomogeneousBoundary  
Condition

Ikarus::DirichletValues  
::evaluateInhomogeneousBoundary  
ConditionDerivative

Ikarus::DirichletValues  
::basis

```
graph LR; A["Ikarus::DirichletValues::evaluateInhomogeneousBoundaryCondition"] --> C["Ikarus::DirichletValues::basis"]; B["Ikarus::DirichletValues::evaluateInhomogeneousBoundaryConditionDerivative"] --> C;
```

The diagram illustrates a relationship between three functions. On the left, there are two white rectangular boxes. The top box contains the text 'Ikarus::DirichletValues::evaluateInhomogeneousBoundaryCondition'. The bottom box contains the text 'Ikarus::DirichletValues::evaluateInhomogeneousBoundaryConditionDerivative'. On the right, there is a gray rectangular box containing the text 'Ikarus::DirichletValues::basis'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both functions on the left are related to or perhaps call the function on the right.
