

Ikarus::NonLinearElastic  
::calculateMatrixImpl

Ikarus::NonLinearElastic  
::internalForcesFunction

Ikarus::NonLinearElastic  
::stress

```
graph LR; A[Ikarus::NonLinearElastic::calculateMatrixImpl] --> C[Ikarus::NonLinearElastic::stress]; B[Ikarus::NonLinearElastic::internalForcesFunction] --> C;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left represent functions: 'Ikarus::NonLinearElastic::calculateMatrixImpl' (top) and 'Ikarus::NonLinearElastic::internalForcesFunction' (bottom). Blue arrows point from each of these boxes to a single gray rectangular box on the right labeled 'Ikarus::NonLinearElastic::stress'. This indicates that both functions contribute to or call the stress calculation function.
