The diagram illustrates a dependency or data flow where four different components on the left are all directed towards a single component on the right. The components on the left are arranged vertically and each is enclosed in a rectangular box. The component on the right, 'Ikarus::removeCol', is also in a box but has a gray background. Four blue arrows originate from the right side of each left box and converge on the left side of the 'Ikarus::removeCol' box. The arrows from the top two boxes are slightly curved, while the arrows from the bottom two boxes are more direct.
