```

The diagram illustrates a dependency or data flow where four distinct components on the left converge into a single target component on the right. The components on the left are arranged vertically and represent different material-related operations or data structures. The target component, 'Ikarus::removeCol', is highlighted with a gray background, indicating it is the final destination or a central processing unit for the inputs from the other four boxes. The arrows are blue and point from each of the four source boxes to the target box.
