The diagram illustrates a dependency or data flow where four different components on the left are all directed towards a single component on the right. The components on the left are arranged vertically and each is enclosed in a rectangular box. The component on the right, 'Ikarus::removeCol', is also in a box but has a gray background. Four blue arrows originate from the right side of each left box and converge on the left side of the right box. The arrows from the top two boxes are slightly curved, while the others are more direct.
