::basis

```
graph LR; A["Ikarus::DirichletValues::evaluateInhomogeneousBoundaryCondition"] --> C["Ikarus::DirichletValues::basis"]; B["Ikarus::DirichletValues::evaluateInhomogeneousBoundaryConditionDerivative"] --> C;
```

The diagram illustrates a relationship between three functions. On the left, there are two white rectangular boxes. The top box contains the text 'Ikarus::DirichletValues::evaluateInhomogeneousBoundaryCondition'. The bottom box contains the text 'Ikarus::DirichletValues::evaluateInhomogeneousBoundaryConditionDerivative'. On the right, there is a gray rectangular box containing the text 'Ikarus::DirichletValues::basis'. Two blue arrows point from the right side of the top white box to the left side of the gray box, and from the right side of the bottom white box to the left side of the gray box.
