

Ikarus::NonLinearElastic
::calculateMatrixImpl

Ikarus::NonLinearElastic
::calculateVectorImpl

Ikarus::NonLinearElastic
::stress

```
graph LR; A[Ikarus::NonLinearElastic::calculateMatrixImpl] --> C[Ikarus::NonLinearElastic::stress]; B[Ikarus::NonLinearElastic::calculateVectorImpl] --> C;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left represent functions: 'Ikarus::NonLinearElastic::calculateMatrixImpl' (top) and 'Ikarus::NonLinearElastic::calculateVectorImpl' (bottom). Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box on the right, labeled 'Ikarus::NonLinearElastic::stress'. This indicates that both the matrix calculation and vector calculation functions are used to compute the stress.
