

Ikarus::Materials::
VanishingStress::materialInversionImpl

Ikarus::Materials::
VanishingStrain::tangentModuliImpl

Ikarus::reduceMatrix

```
graph LR; A["Ikarus::Materials::  
VanishingStress::materialInversionImpl"] --> C["Ikarus::reduceMatrix"]; B["Ikarus::Materials::  
VanishingStrain::tangentModuliImpl"] --> C;
```

The diagram illustrates a dependency or data flow. Two source boxes on the left, representing different material models, both point via blue arrows to a single target box on the right, which represents a matrix reduction operation. The top source box is for the VanishingStress model's material inversion implementation, and the bottom source box is for the VanishingStrain model's tangent modulus implementation. Both of these implementations rely on the same reduceMatrix function.
