

Ikarus::NonLinearElastic
::calculateMatrixImpl

Ikarus::NonLinearElastic
::internalForcesFunction

Ikarus::NonLinearElastic
::stress

```
graph LR; A[Ikarus::NonLinearElastic::calculateMatrixImpl] --> C[Ikarus::NonLinearElastic::stress]; B[Ikarus::NonLinearElastic::internalForcesFunction] --> C;
```

The diagram illustrates a dependency or inheritance relationship. On the left, two white rectangular boxes represent source functions: 'Ikarus::NonLinearElastic::calculateMatrixImpl' (top) and 'Ikarus::NonLinearElastic::internalForcesFunction' (bottom). On the right, a gray rectangular box represents the target function: 'Ikarus::NonLinearElastic::stress'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source functions contribute to or are used by the target function.
